FICTIONAL TEST PACKET. Not a real application.

Applicant's Name: Riley Nguyen

STATEMENT OF PURPOSE

I am applying to Northwestern MSAI to go past the capstone I just finished. The capstone was a classifier for campus club event attendance, built with two classmates. I cleaned the registration table, another student trained the model, and I wrote the report. It was a good class project. It is not a system anyone maintained after the term.

I want the MSAI year for the core machine learning sequence and a project that lasts longer than a semester. I am interested in how universities schedule events, which is a small version of a recommendation problem. I have had linear algebra, statistics, a machine learning course, and a databases course. I have not worked in a research group.

I am applying because the program is in the city where I already go to school, and because I want a master's that assumes I will take the foundational courses rather than skip them. I can start from the core. I do not have a paper or an internship model to bring.

EDUCATION

Undergraduate institution: Loyola University Chicago
Degree: B.S. Data Science, 2025
Cumulative GPA: 3.62

RESEARCH

No research appointment.

PROJECTS

Senior capstone, fall 2024, with two classmates. We predicted whether a student would attend a club event from the registration form. I cleaned the data and wrote the final report. I did not train the model. The code is in a course GitHub classroom and was not used after the class ended.

WORK EXPERIENCE

Peer tutor, Loyola data science help room, spring 2024 and fall 2024, four hours a week. Front desk assistant, campus recreation, 2022-2023.

HONORS AND AWARDS

Dean's list, two semesters.

LETTERS OF RECOMMENDATION

Letter 1. Professor Amy Walsh, Loyola University Chicago. "Riley wrote the clearest capstone report in the section. The modeling was a group effort, and Riley's piece was the data and the writing. Riley is ready for a

master's core, and I recommend Riley."

Letter 2. Professor Chris Bell, Loyola University Chicago. "Riley tutored in my help room and was patient and prepared. I recommend Riley for graduate study. I have not supervised research."
