FICTIONAL TEST PACKET. Not a real application.

Applicant's Name: Drew Patel

STATEMENT OF PURPOSE

I hope to study artificial intelligence at Northwestern so I can bring AI to medicine. Biology has been my whole education, and I have done well in it. I believe the next generation of doctors will need AI, and I want to be ready. MSAI is a famous program and Boston has shown me that I can handle hard classes. I am sure I can handle these classes too.

I have not taken a machine learning course. I took one introduction to Python as an elective in my junior year and I enjoyed it. I learn quickly. My plan is to arrive and take the courses, then apply AI to cancer or maybe medical images. I do not have a specific project yet. I am excited to find one with a professor. I know my grades show that I am serious, and I hope the committee will see that potential.

EDUCATION

Undergraduate institution: Boston University
Degree: B.S. Biology, 2025
Cumulative GPA: 3.88

RESEARCH

No computational research. I volunteered in a wet lab for one semester washing glassware, fall 2023. I did not design an experiment.

PROJECTS

Introduction to Python, spring 2024, course assignments only. The final assignment was a script that plotted a CSV of heart rates from the instructor. I have no other programming projects.

WORK EXPERIENCE

Peer tutor for introductory biology, Boston University, 2023-2025.

HONORS AND AWARDS

College of Arts and Sciences prize for biology coursework, 2025. Dean's list every semester.

LETTERS OF RECOMMENDATION

Letter 1. Professor Laura Kim, Boston University. "Drew earned an A in both of my biology courses and tutored students who were failing the first exam. Drew is diligent and kind. I have not seen Drew write research code. On the academic record I do have, I recommend Drew."

Letter 2. Dr. Steven Cho, Boston University. "Drew was reliable in my laboratory as a volunteer. The tasks were preparatory. Drew followed instructions. I support Drew's interest in further study and I cannot speak to preparation in computer science."
