FICTIONAL TEST PACKET. Not a real application.

Applicant's Name: Quinn Alvarez

STATEMENT OF PURPOSE

I am applying to MSAI because I want a fresh start in artificial intelligence at a top school. I think Northwestern can give me the environment I need to focus. I am interested in all areas of AI, from robotics to language, and I will work harder in graduate school than I did as an undergraduate. I had some research experience and I know what labs are like.

Please consider the person I am becoming and not only my GPA. I am passionate and I will contribute. A master's degree is my path into the industry. I would be grateful for an offer and I will make the most of it.

EDUCATION

Undergraduate institution: Arizona State University
Degree: B.S. Computer Science, 2024
Cumulative GPA: 2.95

RESEARCH

Unpaid observer in a robotics lab, May 2024, about four weeks. I attended two group meetings and watched a doctoral student collect data. I did not write code for the lab and I am not on a paper.

PROJECTS

Course projects required by the degree: a socket chat program, a small web scraper, and a class assignment that trained a decision tree on a provided CSV. I do not have an independent project.

WORK EXPERIENCE

Seasonal retail associate, 2022 and 2023 summers.

HONORS AND AWARDS

None.

LETTERS OF RECOMMENDATION

Letter 1. Professor Alan Ruiz, Arizona State University. "Quinn completed my course. The project met the minimum specification. Quinn missed two deadlines and submitted the scraper a week late. I can confirm the degree progress. I do not have a stronger recommendation than that."

Letter 2. Graduate student Morgan Lee, Arizona State University. "Quinn visited our lab for a few weeks. Quinn was polite. Quinn did not take on a task. I cannot recommend Quinn for a research program on the basis of that visit."
