FICTIONAL TEST PACKET. Not a real application.

Applicant's Name: Harper Singh

STATEMENT OF PURPOSE

I am writing to apply for the MSAI program because artificial intelligence is changing communication and I want to be at the center of that change. I have a communications degree and I completed an online certificate in AI for everyone. The videos were inspiring. I believe my background in writing and presentations is exactly what technical teams are missing, and Northwestern is where I want to learn the technical side.

I do not have programming courses beyond the certificate quizzes. I am a fast learner and a strong communicator, and I know I can pick up the coding once I am in the classroom. My goal is to lead AI product teams. I would bring energy and storytelling to the cohort. I hope you will give me the chance to show that a nontraditional student belongs in this program. I will not waste it.

EDUCATION

Undergraduate institution: University of Iowa
Degree: B.A. Communications, 2024
Cumulative GPA: 3.10

RESEARCH

No research experience.

PROJECTS

Online certificate, "AI for Everyone," 2025, with short quizzes. I did not write code. Class presentation project in a communications course: a slide deck about how chatbots change customer service, based on news articles.

WORK EXPERIENCE

Social media assistant, a campus arts series, 2023-2024. I wrote posts and a newsletter. Intern, a local radio station, summer 2023, where I booked guests.

HONORS AND AWARDS

Student radio volunteer of the semester, fall 2023.

LETTERS OF RECOMMENDATION

Letter 1. Station manager Robin Blake. "Harper booked guests and wrote clear introductions. Harper is articulate and reliable in a newsroom. I recommend Harper for work that uses those skills. I have not seen technical or quantitative work."

Letter 2. Instructor Caroline Weiss, University of Iowa. "Harper writes well and spoke confidently in my course. The chatbot presentation was polished. It was not a technical analysis. Harper is a strong

communications student, and that is the basis of this letter."
